

Key

- Site Location
 - Location of solar panels used in ZTV calculation
 - Chilterns Area of Outstanding Natural Beauty
- ZTV of 3m high solar panels
- Approx. 1%-17% of development theoretically visible
 - Approx. 18%-34% of development theoretically visible
 - Approx. 35%-51% of development theoretically visible
 - Approx. 52%-68% of development theoretically visible
 - Approx. 69%-85% of development theoretically visible
 - Approx. 86%-100% of development theoretically visible
 - Viewpoint Locations
 - Extent of Figure 3

NOTES

1. Zone of Theoretical Visibility (ZTV) has been generated using Ordnance Survey Terrain 50 (digital terrain model) data, which is a bare earth model that does not reflect the presence of screening features in the landscape.
2. ZTV generation has allowed for the curvature of the earth, and for light refraction
3. ZTV has been generated based upon an observer eye height of 1.7m above ground level
