

Note on a current application for a Solar Farm.

22/00709/FP - PROPOSED SOLAR FARM MEASURING 35.5 HECTARES WITH ASSOCIATED BATTERY STORAGE AND ANCILLARY INFRASTRUCTURE ON LAND TO THE SOUTH OF WYMONDLEY SUBSTATION AND SOUTH OF SPERBERRY HILL, ST IPPOLYTS

An application for a solar farm south of Little Wymondley (22/00709/FP) referred to in the SoC by JOG is currently under consideration by the Council and may be reported to Planning Control Committee in November. A recommendation on this application has not been finalised. The Solar Farm would generate 35Mwe during peak operation and would link to the Little Wymondley Transforming Station which is located immediately to the north of the application site.

This site lies within the Green Belt and on BMV agricultural land. If the Council resolved to grant permission the application would need to be referred to the Secretary of State.

Part of the site was the subject of an appeal for a solar farm that was dismissed in April 2017 (Ref 15/01532/1).
