

Dr. Desiree Scott
20 High Street, Graveley, Hertfordshire, SG4 7LA
Telephone: 07931 221386

- 1) I am a retired Doctor of Psychiatry and have lived in Graveley since 2000. I have always been interested in animals, but I was persuaded to do medicine instead. Fauna have always been of interest to me and I have continued that interest since my retirement ten years ago.

- 2) I have authored the following books:-
“Borzoï (Comprehensive Owner’s Guide)” (1999)
“Briard (Comprehensive Owner’s Guide)” (2002)

- 3) My interest, as a hobby, has led me to assemble details about fauna throughout Hertfordshire. I attach a map of Hertfordshire broken down into 1 kilometre squares. I use it to show where, from various reliable sources of information I have recorded protected and endangered species of fauna. Thus, taking the 5 kilometre square TL22, I have prepared the attached list of protected and endangered species in that large square, which contains Graveley.

- 4) My belief is that the fixing of Green Belts was intended to protect the countryside, with its flora and fauna, and agricultural land for food production. Therefore, I am opposed to any significant building on the Green Belt anywhere in North Hertfordshire.

Signed:

.....

Dr. Desiree Scott
